

Blood Disorder Presentation

Group Members:

- 1.
- 2.
- 3.

Blood Disorder: _____

In-Class work time: _____

Present on: _____

You have been assigned a blood disorder. Your group must research this disorder and present the information to the class. You will be expected to take notes on these disorders during presentations, as they may appear on the Cardiovascular Test. The group presentation may be done using PowerPoint, Prezi, or creating a video (i.e. an interview, a visit to the doctors office, etc.). Each group member must talk during the presentation. The presentation must include the following:

What is the disorder? Explain it.

How does the disorder occur?

Is it genetic?

Is it preventable?

What are the symptoms?

What are the short term effects of the disorder?

What are the long term effects of the disorder?

Can this disorder lead to death?

Is the disorder preventable?

Is there a treatment for the disorder? If so, what?

Is there current research to either find or improve a treatment for this disorder?

Extra Credit:

When and how was this disorder first discovered?

Tell us about someone who has it (celebrity, interview a friend/family member)

Grades will based on:

Accurate Information	_____ /30
Answering the Questions Listed	_____ /10
Presentation (Professional, Engaging, Participation)	_____ /10
Extra Credit	_____
Total Score	_____ /50
